## INFORMATION FOR STUDENTS

Dear students, the lecturers are aiming to maximize your understanding of various topics around microbiome in health and disease. For the biggest impact on your learning experience, please come prepared to the Summer School:

1. Read the recommended publications, which will lay the foundation for your understanding of the in-person lectures.
2. Prepare research- and methods-related questions based on your projects. Collect your career & soft-skills-related questions. **More information will be communicated beginning of June 2024.**

During the Summer School, the in-person lecturers will share with you their expertise on the status of their research field as well as the direction of future developments.

Within the peer-chat corners and during the evening roundtable discussions, you will have plenty of time to address your questions.
